Springer International

Founded in 1958. Volumes 1–3 were titled “Zeitschrift für Zellforschung und mikroskopische Anatomie”, with the subtitle “Abteilung Histochemie”. Beginning with Volume 4 the title was changed to “Histochemie/Histochemistry/Histochimie”. From Volume 38 the journal is called “Histochemistry”.

### Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

*While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.*

### *Special regulations for photocopies in the USA*

Photocopies may be made for personnel or inhouse use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US\$0.20 per page per copy, plus a basic fee of US\$2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0301-5564, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

**This journal is included in the ADONIS service, whereby copies of individual articles can be printed out from compact discs (CD-ROM) on demand. An explanatory leaflet giving further details of the scheme is available from the publishers on request.**

Presenting You With a Brand New Concept

The key to  
successful experiments!

# Springer Laboratory

J. H. Peters, H. Baumgarten (Eds.)

## **Monoclonal Antibodies**

1992. XVII, 488 pp. 74 figs. 22 tabs. Hardcover DM 98,-  
ISBN 3-540-50843-0

Procedures for hybridoma generation as well as detailed test protocols for the characterization and application of monoclonal antibodies are featured in this manual designed especially for use at the lab bench.

Immunization, cell preparation, hybridization, cell culture and the cloning of hybridomas, the prevention of back-mutation, purification, labeling, and the characterization of the antibodies obtained are just a sample of keywords taken from the contents.

C. Kessler (Ed.)

## **Nonradioactive Labeling and Detection of Biomolecules**

1992. XXIII, 436 pp. 58 figs. 22 tabs.  
Hardcover DM 128,- ISBN 3-540-55482-3

All the bioanalytical labeling and detection techniques in one source! This book gathers together all the important nonradioactive labeling techniques for nucleic acids, proteins and glycoproteins like DIG, Biotin, BrdU, Sulfone, Immunogold, Silver Enhancement, and SNAP as well as the standard procedures for optical, chemi-, bio- or electrochemiluminescent and fluorescent detection.

A. Radbruch (Ed.)

## **Flow Cytometry and Cell Sorting**

1992. X, 223 pp. 58 figs. 6 tabs. Hardcover DM 98,-  
ISBN 3-540-55594-3

The practical aspects of flow cytometry and sorting are emphasized in this book which introduces the beginner to the technology but also provides tips and tricks for the advanced user. The clear structure makes it easy to address specific problems fast. The chapters cover the modern applications of these procedures. The methods have been field-tested in recent EMBO courses on flow cytometry.

A. Rolfs, I. Schuller, U. Finckh, I. Weber-Rolfs (Eds.)

## **PCR: Clinical Diagnostics and Research**

1992. XIX, 370 pp. 95 figs. Hardcover DM 88,-  
ISBN 3-540-55440-8

The "how-to" book for every laboratory using PCR! Complete information about PCR procedures, combined with the discussion of contemporary opinions, gives a good overview of this multifaceted method and its applications. Even experienced laboratories will welcome the clear presentation of demanding procedures such as the exact quantification of PCR products or the in-situ PCR. Protocols that have been tried and tested provide swift support for troubleshooting all sorts of procedural problems.

B. Wencławiak (Ed.)

## **Analysis with Supercritical Fluids: Extraction and Chromatography**

With contributions by numerous experts

1992. Approx. 250 pp. 117 figs. 9 tabs. Hardcover DM 148,-  
ISBN 3-540-55420-3

The volume provides a comprehensive treatment of supercritical fluid chromatography (SFC) and supercritical fluid extraction (SFE); it gives attention to both theory and practice. The contributions are written by leading experts in their fields with exhaustive practical experience in SFC and SFE.

H.-H. Perkampus

## **UV-VIS Spectroscopy and its Applications**

1992. IX, 244 pp. 78 figs. 21 tabs. Hardcover DM 168,-  
ISBN 3-540-55421-1

The author has created a detailed and comprehensive reference work on all important aspects of UV-VIS spectroscopy, including investigations on chemical kinetics and chemical equilibria. The volume is an invaluable source of information on UV-VIS spectroscopy and its applications for specialists and non-specialists.

## **Series of Slides for the Atlas of Histopathology of the Cervix Uteri**

1992. 40 color slides with legends.  
DM 280,- ISBN 3-540-92119-2

This series consists of 40 slides, the best of the more than 200 fantastic figures in the book, **Atlas of Histopathology of the Cervix Uteri**. These slides are the ideal teaching tool for instructors in gynecological pathology, indeed, they can be used to advantage in any oral presentation on the subject, whether in the classroom or at a scientific meeting.

The atlas itself provides a highly detailed differential diagnosis of morphologic changes in the uterine cervix, correlating them with the clinical aspects of disease. After a description of normal histology, the action of steroid hormones on the cervical tissues is discussed and inflammatory changes are examined. The following chapters deal with the various forms of regeneration, premalignant changes and lastly with benign and malignant neoplasms of epithelial and mesenchymal origin.

This up-to-date atlas reviews the latest cytologic, histopathologic, immunohistochemical and virological studies including in situ hybridization illustrating an elegant method to identify and differentiate the various types of papilloma viruses. It warns of the worldwide changing and accelerating development of cervical cancer in young women caused by specific types of papilloma viruses, which must be identified in order to give patients proper treatment and care.

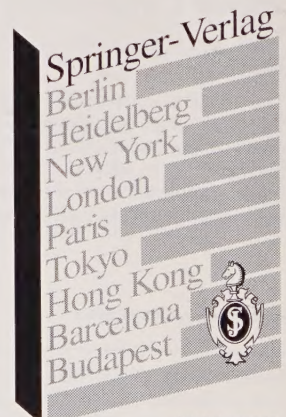

## **THE BOOK!**

**Atlas of Histopathology of the Cervix Uteri**  
1990. DM 220,- ISBN 3-540-52295-6
